Overview

Description

Publication date: October 2012

Copyright © 2011-2012 Serena Software, Inc. All rights reserved.

This document contains descriptions for the ZMF ERO for RLM Web services. The services are implemented and run under the Apache Axis infrastructure and call the current ZMF XML services to process requests.

Web Services

Name	Description
EROAdminServices	EROAdminServices are SOA compliant web services for ChangeMan ZMF ERO release admin operations.
EROActionServices	EROActionServices are SOA compliant web services for ChangeMan ZMF ERO release actions.
EROQueryServices	EROQueryServices are SOA compliant web services for ChangeMan ZMF ERO release query operations.

EROAdminServices Web Service

Description

EROAdminServices are SOA compliant web services for ChangeMan ZMF ERO release admin operations.

Document

Input (Literal)

The input of this method is the document element zmf:configureApproverRequestType having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:auth	zmf:Auth	0..1	Security token
zmf:releaseApprovalOrder	xsd:string	1..1	
zmf:releaseApprovalEntity	xsd:string	1..1	
zmf:releaseApproverDesc	xsd:string	1..1	
zmf:notification	zmf:Notification	0..40	
zmf:isReleaseAreaChkInApprover	xsd:boolean	0..1	
zmf:isReleaseAreaChkOffApprover	xsd:boolean	0..1	
zmf:isReleaseInstallApprover	xsd:boolean	0..1	
zmf:isReleaseRelatedApprover	xsd:boolean	0..1	

Output (Literal)

The output of this method is the document element zmf:releaseAdminResponse having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:status	ns1:status	0..1	

Faults

Name	Content	Description
EROAdminServiceException	zmf:EROAdminServiceException	

Method: configureAssociatedApprover

Action

Document

Output (Literal)

The output of this method is the document element zmf:getVersionResponseType having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:version	xsd:string	0..1	

Faults

Name	Content	Description
EROAdminServiceException	zmf:EROAdminServiceException	

Method: undeleteRelease

Action

Style

Document

Input (Literal)

The input of this method is the document element zmf:undeleteReleaseRequestType having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:auth	zmf:Auth	0..1	Security token
zmf:release	xsd:string	1..1	

Output (Literal)

The output of this method is the document element zmf:releaseAdminResponse having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:status	ns1:status	0..1	

Faults

Name	Content	Description
EROAdminServiceException	zmf:EROAdminServiceException	

Complex Types: EROAdminServices

Complex Types

Method: approveRelease

Action

urn:approveRelease

Style

Document

Input (Literal)

The input of this method is the document element zmf:approveReleaseRequestType having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:auth	zmf:Auth	0..1	Security token
zmf:release	xsd:string	1..1	
zmf:approverEntity	xsd:string	1..1	

Output (Literal)

The output of this method is the document element zmf:releaseActionResponse having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:status	ns1:status	0..1	

Faults

Name	Content	Description
EROActionServiceException	zmf:EROActionServiceException	

Method: approveReleaseCheckin

Action

urn:approveReleaseCheckin

Style

Document

Input (Literal)

The input of this method is the document element zmf:approveReleaseCheckinRequestType having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:auth	zmf:Auth	0..1	Security token
zmf:release	xsd:string	1..1	
zmf:releaseArea	xsd:string	1..1	
zmf:approverEntity	xsd:string	1..1	

Output (Literal)

The output of this method is the document element zmf:releaseActionResponse having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:status	ns1:status	0..1	

Faults

Name	Content	Description
EROActionServiceException	zmf:EROActionServiceException	

Method: approveReleaseCheckoff

Action

urn:approveReleaseCheckoff

Style

Document

Input (Literal)

The input of this method is the document element zmf:approveReleaseCheckoffRequestType having the structure defined by the following table.

Element	Type	Occurs	Description
SEQUENCE		1..1	
zmf:auth	zmf:Auth	0..1	Security token
zmf:release	xsd:string	1..1	
zmf:releaseArea	xsd:string	1..1

Description

Method of creating a package.

Derived By

Restricting xsd:string

Enumeration

Value	Description
SHORT	
COPY-FORWARD	
LONG	

Simple Type: ns1:dataTypeDesc

Derived By

Restricting xsd:string

Enumeration

Value	Description
TEXT	
BINARY	

Simple Type: ns1:packageLevelDesc

Description

Package level description.

Derived By

Restricting xsd:string

Restrictions

- Length of value must be less than or equal to 15.

Enumeration

Value	Description
SIMPLE	
COMPLEX	
SUPER	
PARTICIPATING	

Simple Type: ns1:packageStatusDesc

Description

Package status description.

Derived By

Restricting xsd:string

Restrictions

- Length of value must be less than or equal to 3.

Enumeration

Value	Description
APR	
BAK	
BAS	
CLO	
DEL	
DEV	
DIS	
FRZ	
INS	
OPN	
REJ	
TCC	

Simple Type: ns1:packageTypeDesc

Description

Package type description.

Derived By

Restricting xsd:string

Restrictions

- Length of value must be less than or equal to 25.

Enumeration

Value	Description
PLANNED-PERMANENT	
PLANNED-TEMPORARY	
UNPLANNED-PERMANENT	
UNPLANNED-TEMPORARY	

Simple Type: ns1:problemActionCodeDesc

Description

Action to be taken if a problem occurs when a package is installed.

Derived By

Restricting xsd:string

Enumeration

Value	Description
HOLD-PRODUCTION	
BACKOUT-CHANGE	
OTHER	

Simple Type: ns1:promotionActionDesc

Description

Promotion action description.

Derived By

Restricting xsd:string

Enumeration

Value	Description
NONE	
FULL-DEMOTION	
FULL-PROMOTION	
REVERT	
SELECTIVE-DEMOTION	
SELECTIVE-PROMOTION	
FIRST-PROMOTION	

Simple Type: ns1:recordTypeDesc

Derived By

Restricting xsd:string

Enumeration

Value	Description
NON-SOURCE	
SOURCE	

Simple Type: ns1:reqTypePromHistDesc

Description

Promotion history request type description.

Derived By

Restricting xsd:string

Enumeration

Value	Description
FULL-PROMOTION-HISTORY	
SITE-STATUS	

Simple Type: ns1:schedulerTypeDesc

Description

Type of scheduler used.

Derived By

Restricting xsd:string

Enumeration

Value	Description
CMN	
MANUAL	
OTHER	

Simple Type: ns1:siteInfoStatusDesc

Description

Site information status description.

Derived By

Restricting xsd:string

Restrictions

- Length of value must be less than or equal to 10.

Enumeration

Value	Description
FROZEN	
REFROZEN	
UNFROZEN	

Simple Type: ns1:siteTypeDesc

Description

Type of scheduler used.

Derived By

Restricting xsd:string

Enumeration

Value	Description
ALL	
PROMOTION	
PRODUCTION	

Simple Type: ns1:stageLibStatusDesc

Description

Staging library status description.

Derived By

Restricting xsd:string

Enumeration

Value	Description
LIBRARIES-UNDEFINED	
LIBRARIES-EXIST	
LIBRARIES-ARCHIVED	

Elements: EROActionServices

Description

Component type attribute which determines how a component is processed.

- 1 - Copy.
- 2 - Load.
- 3 - Other.
- 4 - PDS.
- 5 - Source.
- 6 - NCAL subroutine.
- 7 - Object code subroutine.

Derived By

Type ns1:likeType

Restrictions

- Length of value must be less than or equal to 1.

Enumeration

Value	Description
1	
2	
3	
4	
5	
6

Element: zmf:relation [element listReleaseAreaComponentImpactRequest]

Description

Impact relationship.
CPY - subordinate copybooks,
HSH - component hash token,
DSN - dataset names that are referenced in JCL components,
LOD - subordinate statically linked subroutines,
PGM - programs that are executed via EXEC PGM= in JCL components,
PRC - procedures that are invoked via EXEC in JCL components,
SSI - component setssi.

Derived By

Type ns1:impactRelationship

Restrictions

- Length of value must be less than or equal to 3.

Enumeration

Value	Description
CPY	
DSN	
HSH	
LOD	
PGM	
PRC	
SSI

Element: zmf:releaseApproveMinRule [element listReleasesResults/result]

Description

Release area approve rule.
0 - No approvals required.
1 - Approvals required before Check-in.
2 - Approvals required before advancing to the next area (Check-off).
3 - Both rules 1 and 2.

Element: zmf:releaseAuditMinRule [element listReleasesResults/result]

Description

Release area audit rule.

0 - Audit optional.

1 - Audit required, RC less than 20 (audit failure).

2 - Audit required, RC less than or equal to 12 (out-of-sync errors within audited area).

3 - Audit required, RC less than or equal to 8 (out-of-sync errors with respect to next areas/final areas in prior releases/baseline).

4 - Audit required, RC less than or equal to 4 (no out-of-sync errors but some duplicates exist).

5 - Audit required, RC == 0 (no out-of-sync errors and no warnings).

Description

Release area retrieve rule.
0 - Retrieve wide open any area blocked or unblocked.
1 - Retrieve only from unblocked areas.
2 - Must pass entity check (Rule 0).
3 - Rule 1 and Rule 2.
